## Mike's 1996 Honda Civic

Article by: Allen Chung  
Photos by: Scott Mitchell  
Model: '96  
Owner: Mike  
Year: 1996  
Manufacturer: Honda  
Location: Oahu, Hawaii  
Color: Custom Mix Silver  
Model: Civic

No stranger to Hawaii's import tuning world, Mike Kamenmoto has established a reputation of building and tuning a few dope cars that have recently hit Hawaii's race and show scene. This '96 Honda Civic is his rent incarnation...

They say a person's car is a representation of one's inner-self. We express ourselves through the curves, lines and sounds of the cars we drive and upgrade. This clean, bubbly capable '96 Honda Civic is a fine example of the owner's personality. Naturally quite, it's also a fast flyer, but is able to flash precision like skill, reliable power and killer instinct straight to the car when called for.

Fully aware of the many potent engine selections Honda had to offer, Mike chose the venerable 2.2 liter H22a engine from the now former Honda Prelude lineup. The engine is left basically stock in the exception for a custom air intake and GReddy Evolution dual exhaust. But has still managed a best quarter mile time of 14.2 seconds showing exactly what can happen when you unleash 200 naturally aspirated horses in a light, agile car.

Gone is the bland, econo-box look. The car now flexes a genuine Buddha Club Body Kit bathed in a custom Honda silver mix paint with Mugen graphics flowing gracefully from the front fenders out to the rear quarters. A Kaminari carbon fiber hood rests ever so lightly atop the 2.2 liter demon and leaves onlookers guessing what this Civic is really packing underneath it. Projector headlights were installed to add the finishing touch on the exterior spectrum. The interior is host to a full Integra Type R treatment with the only other additions being a Civic G gauge cluster and an authentic Mugen shift knob.

Blatant coil-overs replace the obsolete stock equipment allowing the fenders to tuck ever so nicely over the equipped 17" SSR Type C's. Nitto 555's are the choice of rubber, sized at 205/40ZR17. Brake upgrades consist of a full 5-lug disc swap from the JDM Type R variant with updated x-drilled rotors. A custom made carbon fiber brace ties the front strut towers together and accents the 'all business' attitude in the engine bay.

The future is unclear what other pet projects Mike might have up his sleeve but you can be sure they'll be well thought out and perfectly executed.

**A SIMPLE PRAYER**

A while ago I remember saying a prayer,  
I remember asking for someone who would always be there.  
I asked for the perfect guy who was kind and very sweet,  
someone, anyone would be lucky just to meet.  
Later on I remember thinking of my prayer... Only a dream.  
for no guy was as perfect as they first seem,  
then I realized my dream did come true upon the first day that I met you.  
I never want to hurt you, not in any way  
and I can't help loving you a little more each day.  
Soooo... with a simple prayer in mind,  
I want you to know that no matter what happens I'll never let you go.  
To someone very special!  
Thia S.
